This is a piece written for a Forex trading product that beat the control in A-B-C split testing and went on to become the hook of a sales page for another product for the same client. SUB: Your $1,000 Could Become $36 Million!

"Wall Street Doesn't Want You To Know—You Could Turn $1,000 Into As Much As $36,118,865—In The Same Amount Of Time The NYSE Makes Just $70K"

There are only two things we get to spend in this world: Time and Money. It is possible to free-up time with money, but can you really buy money with time?

Yes, but not how Big Business wants you to…

Learn how to spend less time and make more money, here.

Google "How to turn $1,000 into $1M investing," and you know what you get? Pages of penny stocks, IPOs, and 401Ks. They have full-color charts, showing *how S&P investors could have $70,000 now if they'd put their $1,000 into the market in… 1975?!*

Give me a break!

Stocks can be a worthwhile investment, but if you're like me, **you can't wait 40 years for a measly $70K!**

$70K could get you the house, but not the truck to tow it!

To see what your money could really do for your retirement, go here.

Thanks to good old Standard & Poors, you would finally have enough to invest in a barren tract of land, a "tiny house," or maybe meet your basic needs—for a year.

You know what isn't in the first three pages of Google results? **What you could have with $1,000 invested in the $5 trillion-dollar-a-day Foreign Currency Exchange.**

Why? The "powers that be" want you to believe it's impossible to make real, solid cash by investing in anything. But that is a lie.

The ultra-wealthy, from George Soros to the father of all investing, Warren Buffett, all sink money into Forex every single day.

Because they know that the same $1,000 you could invest in the NYSE with that 20% return rate could do this in just ONE YEAR in Forex:

	30% Rate	**50% Rate**	**75% Rate**
Jan	$1,300	$1,5000	$1,750
Feb	$1,690	$2,250	$3,062.50
